Offering an Efficient Reading Training Program for High School and College Students

This six week program which is geared especially for ninth and tenth graders is a recommended precursor to the (P)SAT and/or ACT prep programs. It is also an excellent course for rising college freshmen so they are better able to handle the more demanding level reading.

The goal of the program is to train students to develop a reading range from 300 wpm. to 1000 wpm. Ideally, once students have pushed themselves to high 'practice' speeds, their 'habit' reading rate will rise as well. Ultimately, students will become flexible readers in that they will learn how to adapt their reading speed based upon purpose and content. Study skills and note-taking will also be addressed. Additionally students will learn how to approach reading standardized test passages (when relevant), newspapers, periodicals, reviews, novels, and textbooks.

The 6.5 hour program is offered on a tutorial basis or semi-privately. The first lesson is an hour and a half; the remaining sessions are one hour. The total tuition is \$1365; the semi-private program is \$975 each. (All materials are included in the tuition.)
